DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - A. Claims 1-21, 49-54, and 56 are drawn to a ring system transmitting variable and fixed rate channels, classified in class 370, subclass 468.
 - B. Claims 22-31 are drawn to a communications system wherein each station signals to each other the traffic condition, classified in class 370, subclass 522.
 - C. Claims 32-34 are drawn to a method of preventing congestion caused by buffer full condition, classified in class 370, subclass 416.
 - D. Claims 35-48 are drawn to a method of allocating a communication channel, classified in class 370, subclass 431.
 - E. Claims 55, 57-63 are drawn to communication system and method a specific time slot is reserved for each connection, classified in class 370, subclass 443.
 - F. Claims 64 and 65 are drawn to a method of converting a system of digital signal to another, classified in class 341, subclass 50.
2. Inventions A, B, C, D, E, and F are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the invention A is directed to a ring system transmitting variable and fixed rate channels; the invention B is directed to a communications system wherein each station signals to each other

the traffic condition; the invention C is directed to a method of preventing congestion caused by buffer full condition; the invention D is directed to a method of preventing congestion caused by buffer full condition; and the invention E is directed to a method of converting a system of digital signal to another. Therefore, the inventions A, B, C, D, E, and F have different functions and different effects.

3. Because these inventions are distinct for the reasons given above and the search required for each group is not required for other groups, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
